

# StudyBoost Project

STARTUP PRESENTATION

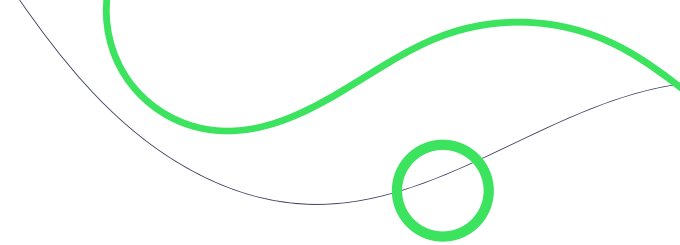

# Problem Statement

We decided to create StudyBoost after observing common challenges students face in exam preparation at Innopolis University.

# **Little Research Provided**

# Key findings

1

All participants rely on Notion for note-taking and study preparation.

2

Two out of three participants utilize Quizlet for creating and studying flashcards.

3

Integration issues among these tools were highlighted by two out of three participants as a significant usability challenge in their current study routines.

## The Solution

Our project provides an integrated study tool available as a website, designed to address the diverse needs of students at Innopolis University. By offering functionalities such as automatic quiz generation from notes, concise note summarization, our solution enhances learning efficiency and organization. The tool creates personalized and relevant study aids, ensuring adaptability to individual learning styles.

**Other details  
next week**

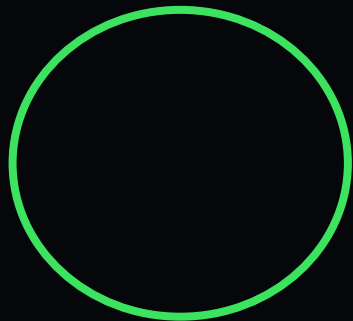

# Conclusion

Improving study relies on human's self assessment and best tool for that - our application with quizzes and notes summary

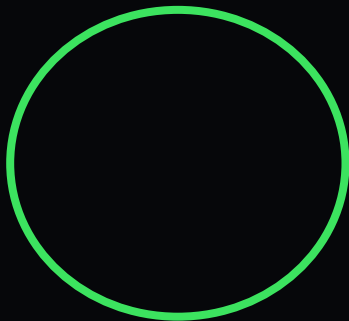

**Give it a try for a boost in your studies!**
